Be sure to read it before assembling or using.

In order to prevent harm to yourself and others, loss to property, beforehand, please follow the notes below safely when assembling and using..

Meaning of mark

 caution	Failure to damage the holder and device, please be careful.
--	---

caution

- When assembling, do not push the connector with the mobile battery. There is a danger of breaking the mobile battery substrate.
- Be careful not to overtighten the screw tightening. Holder screw thread and connectors will be damaged.
- When assembling or using, remove 5VUSB cable from device.

Package Contents

- Holder body 1 piece
 - Battery fixing screw 2 pieces (installed)
 - Connector fixing screw 1 piece (installed)
 - Spacer seal 2 pieces
- 
- 

Name of each parts

Assembling method

1. Remove the 5V USB cable from the device
2. Turn white substrate inside connector up

3. Use a pencil to mark the **36mm** from the tip

4. Turn white substrate inside connector up, Plug the connector into the holder to the

position of the pencil marker

(In order to fix the connector, the connector insertion port is designed to be narrow. If insertion fails, adjust it while scraping with the rasp etc. on the side of the inside of the connector insertion port or the outside of the connector)

5. Insert the mobile battery into the holder and then insert it into the connector while rotating it slowly
6. Make sure the mobile battery is fully inserted into the holder. Do not press the connector with the mobile battery when

adjusting the position.

7. Tighten the Hexagon Socket Setscrew and fix the connector. Do not tighten more than necessary. (Overtightening may cause damage to the connector)
8. Make sure the connector is secure and can not be pulled out. (Do not pull on the connector cable)
9. Adjust it while tightening the hexagonal wrench little by little if it seems to come off or move.
10. Remove the mobile battery from the holder.

- Attach a spacer seal to the inside center of the holder to prevent the mobile battery from falling off.

- Once more, insert the mobile battery.
- Using a Phillips screwdriver, lightly tighten the two mobile battery fixing screws. (Overtightening may damage the threads.) Make sure that the mobile battery can not be pulled out. If it is easy to come off, put another spacer seal on it.

How to use

- Connect the white 4-pole connector of the 5V USB cable to the device and so on.
 - Press the Mobile Battery LED button and turn on the power.
 - Insert the mobile battery into the holder. (When connecting the mobile battery to the connector, insert it while rotating it to the left and right)
 - Check that the mobile battery's power lamp is on through the holder's power lamp check hole.
 - Tighten the two mobile battery fixing screws.
- When fixing the holder to the car body or other things, use a strong adhesive double-sided tape or the like.
 - To charge the battery, loosen the two plus (+) screws and remove the battery.

Care

To clean the holder, gently wipe it with a cloth moistened with mild detergent to remove dirt.

Trouble shooting

Before thinking that it is a breakdown ... Check the following.

Mobile battery can be pulled out even if you tighten the screw.

Holders have some individual differences. Attach another spacer seal. In the case where there is no seal due to incorrect attachment and so on, a commercially available seal can be substituted.

Connector does not fit into the holder

The holder is designed with a slight gap in the connector socket so that the connector does not move. If it can not be inserted, scrape adjust the inside of the connector socket or the outside of the connector with a file.

Guarantee provision

Our liability guarantee period is 6 months from the date of purchase. In the case of failure under normal use conditions (usage conditions according to this instruction manual), repair it free of charge or replace it with a substitute. However, the shipping cost from the customer to us should be paid by the customer.

- Even within the warranty period, free repair or replacement is not possible in the following cases.
- If there is no proof of purchase shop and date of purchase, and more than 6 months have passed since production.

- Mistake in use, a failure due to influence from other device, a failure due to remodeling or damage.
 - Failure or damage due to fire, lightning or abnormal voltage.
 - Breakdown or damage due to exhaustion or worn down, scratches on use, and so on.
 - When the business trip expense occurs according to the customer's request.
- The warranty is valid only in Japan.
